

Why They'd Come Back:

- "The Intern Education Days let me have exposure to a variety of work across all of JAG's companies."
- "Everyone was helpful, kind, and insightful. I was able to learn a lot without being afraid to ask questions."
- "I was part of the team with my own responsibilities."
- "We worked closely with company executives."
- "We did a lot of fun things outside the office; Blue Claws game, team building arcade visit, attended industry events, and even did some community service."

CORE VALUES

REPUTATION
WORK ETHIC
TEAM ACCOMPLISHMENT

At JAG Companies, **Northeast Remsco Construction**, **Caldwell Marine International**, and **Huxted Trenchless**, our interns don't watch from the sidelines; they're valued team members contributing to real-life projects. From treatment plants to supporting trenchless projects to submarine cable installations, our interns played a significant role in projects that make a difference and gained hands-on experience in a variety of areas:

- Field Work
- Assisting Project Teams
- Site Visits & Inspections
- Contracts
- Reviewing Submittals
- Quotes
- Design Drawings
- Take-Offs
- Parts Inventory
- Quality Control
- Material Calculation
- Presentations
- EasyBid Software
- AutoCad
- Risk Management
- Safety

Constructing
Reliable
& Sustainable
Infrastructure

SUMMER INTERN PROGRAM

HEAVY CIVIL • TUNNEL
DRILLING • MARINE
CONSTRUCTION COMPANIES

FIELD PROJECTS

What They Did:

- Assisted with quotes, takeoffs, submittals, and daily activity logs
- Supported project teams on jobsites with documentation and photos
- Communicated with vendors, subcontractors, and laborers
- Learned how projects move from inception to completion

What They Learned:

This summer, our project interns sharpened their technical skills while learning how to manage deadlines in a fast-paced construction environment. They also gained firsthand insight into the power of **WORK ETHIC**, discovering how communication and collaboration bring complex designs to life as successful projects.

ESTIMATING

What They Did:

- Reviewed and analyzed project plans
- Performed takeoffs
- Worked with site utilities and concrete estimators
- Participated in pre-bid meetings and bid reviews
- Managed timelines to ensure deliverables

What They Learned:

Our interns walked away with a deeper understanding of the construction industry and the confidence to apply their classroom knowledge in real-world situations. They consistently highlighted communication, problem-solving, and **TEAM ACCOMPLISHMENT** as key takeaways from their summer experience.

Our interns were exposed to subspecialties within JAG Companies outside of their main projects for the summer. It made the experience even more rewarding.

SAFETY/RISK MANAGEMENT

What They Did:

- Helped define risk
- Recognizing what risk affects
- Aided in risk management - protecting people, projects, and profit
- Analyzed insurance, its importance, and renewals
- Premium calculation
- Evaluated policy coverage

What They Learned:

Our interns gained practical insight into the critical role safety plays in every phase of construction. While completing their OSHA 30 certification, they applied classroom lessons in the field - strengthening their understanding of signage, PPE, and regulatory compliance. They acquired confidence in identifying hazards, understanding safety standards, and supporting a safer work environment to uphold our **REPUTATION**.
